

Kunal Patel

Data Scientist | AI/ML Engineer

8490861586 | websitekunal@gmail.com | [Linkedin](#) | [Portfolio](#) | [Projects](#) |

Professional Summary

AI and Machine Learning postgraduate student with hands-on experience in Python-based data processing, AI APIs, and workflow automation. Experienced in building automation solutions, integrating LLM APIs, and working on machine learning and NLP projects. Strong foundation in data handling, ML fundamentals, and API integrations, with a proactive learning mindset and ability to document and explain technical work clearly. Seeking entry-level opportunities in AI, ML, or automation-focused roles.

Technical Skills

- **AI & Automation:** n8n, LLM APIs (ChatGPT, Gemini), LangChain, Automation Logic & Process Optimization.
- **Programming & Data:** Python, SQL REST APIs, JSON, Web Scraping & Data Pipelines.
- **AI & Machine Learning:** Regression, Classification, Model Training & Evaluation, NLP, PromptEngineering.
- **Tools & Platforms:** Postman, Git/GitHub, Jupyter Notebook, Google Colab, Cloud, Data Visualization.

Education

Bachelor of Computer Applications (BCA)

Jun 2020 - Apr 2023

Dharmsinh Desai University, Nadiad, Gujarat

- Strong foundation in software development, databases, and backend technologies.

MSc In Artificial Intelligence & Machine Learning

Aug 2024 - Apr 2026

Sardar Patel University, Anand, Gujarat

- Focus on AI systems, deep learning, predictive analytics, and real-world AI applications.

Projects

Live Project

- Face Mask Detections (Live Link - [Project](#))
- Face Intelligence system (Live Link – [Project](#))
- Rakhak AI (Live Link – [Project](#))
- AI-Powered Price & Product Comparison Site (Live Link – [Project](#))

Face Attendance system, Chair Detection system

- Built a Face Attendance System using Face Recognition and OpenCV.
- Developed a Chair Detection System for real-time occupancy monitoring using YOLO.

AI Automation Agents (Blog & E-commerce)

- Developed a Blog Automation Agent to generate and publish content using LLM APIs.
- Built an E-commerce Automation Agent for product tracking, data handling, and workflow automation.

ML, NLP & Computer Vision Projects

- Movie Recommender, Email Spam Classifier, WhatsApp Chat Analyzer, Plant Disease Detection.

Work Experience

AI-ML Engineer Intern

May 2026 – Present

Capermint Technology, Ahmedabad

- Contributed to AI-powered gaming solutions and interactive digital experiences for mobile and web platforms.
- Developed and integrated intelligent features, automation workflows, and data-driven solutions to enhance game performance and user engagement.

AI Engineer Intern

Feb 2026 – May 2026

Elite Workforces Services, Ahmedabad

- Automated business processes using Python, APIs, and n8n, reducing manual effort by ~40%.
- Designed scalable automation systems on SaaS platform ([automationowl](#)) for real-world use cases.

AI Automation Intern

Jan 2026 – Feb 2026

One Percent Media, Ahmedabad

- Developed and tested automation workflows using Python, n8n, and AI tools.
- Integrated AI services into content and operational workflows.
- Assisted in performance analysis and dashboard insights.

Freelance – www.pucho.ai (Remote)

Jan 2026 – Feb 2026

- Designed automation workflows on a platform similar to n8n, Make, Activepieces, and Zapier.
- Converted workflow templates into functional automation pipelines.
- Built API-based automation systems using JSON and logic-based workflows.
